EDUCATION

The University of Toledo, Toledo, Ohio

Bachelor of Computer Science Engineering and Technology | May 2023

- Grade Point Average: 3.327
- Honors & Awards: Awarded President's List (Fall 2016), Dean's List (Spring 2019, Fall 2021, Spring 2022), Recipient of International Student Scholarship

PROFESSIONAL SUMMARY

Results-driven Data Engineer and Analyst with a Bachelor's in Computer Science Engineering and 3+ years of technical experience in data architecture, automated workflows, and systems evaluation. Proven track record in optimizing healthcare data environments, managing electronic systems (including EPIC), and conducting root cause analysis to drive strategic decision-making. Adept at transforming complex datasets into actionable operational analytics while collaborating with cross-functional enterprise stakeholders.

SKILLS

- Data & Tech Skills: Excel (Advanced), SQL, Databases, ERP Systems, Active Directory
- AI Tools & Productivity: ChatGPT, GitHub Copilot, Anthropic, MS Office Suite
- Languages: Python, Java, JavaScript, C, C++, C#, HTML, CSS, Svelte
- Communication: Fluent in English and Korean (Interpretation and Translation)

COLLEGIATE COURSEWORK

- Software Engineering and Human Interfacing, Client/Server Computing, Accounting and Economy, Digital Logic Design, Discrete Structure, Linear/Non-linear Data Structure, Computer Architecture and Organization, Intro to Programming, PLC.

EXPERIENCE

NOX US | *Data Analyst*

June 2023 – May 2026

- Data Analysis & Insights: Utilize advanced Excel and SQL (filtering, joins) for data extraction, defect analysis, and reporting to support business decision-making and identify operational trends.
- Process Improvement: Troubleshoot root causes of claims, provide data-driven corrective actions, and suggest workflow improvements based on data findings.
- System & IT Liaison: Support ERP system implementation and utilize ERP data for operational analysis, reporting, and providing IT support for internal systems and users.
- Automation & Efficiency: Develop and automate data processing workflows using Python and databases to improve reporting accuracy and efficiency.
- Documentation & Stakeholder Communication: Document data processes, validate datasets to ensure accuracy, and clearly communicate findings and data issues to internal stakeholders.
- Compliance & Technical Standardization: Prepare and work on international certifications (ISO, ASTM, EN, Greenguard, etc.) and program database/server/front-end/back-end related tools to digitalize and analyze collected data.

EXPERIENCE

University of Toledo | *Information Technology, Technician*

August 2021 - May 2023

- Cross-Functional Collaboration: Collaborate with clients to identify business objectives, lead technical workshops, and provide ongoing support to IT staff and internal departments.
- Problem Solving & Systems Evaluation: Analyze recurring IT issues faced by various departments, leading to enhanced team performance by 20% and achieving a 95%+ Customer Satisfaction (CSAT) score.

- **System Implementation & Testing:** Support the implementation and quality assurance (QA) testing of new software, including EPIC, and manage electronic assets across multiple departments using Active Directory.
- **Technical Support:** Provided Tier 1-2 technical support for over 21,000 users across academic and administrative departments, testing and deploying software and reimaging computers.

EXPERIENCE

Republic of Korea Marine Corps | *Marine*

August 2019 - March 2021

- **Administration & Data Management:** Managed company members' personal information, prepared extensive materials for long-term training, and scheduled vacations for members.
- **Technical Operations:** Trained to drive, fire, and troubleshoot self-propelled artillery.

TECHNICAL PROJECTS

AutoCareHospital | Healthcare Data Architecture & Solution Design

(<https://github.com/pcho120/AutoCareHospital>)

- Designed and implemented a robust relational database schema tailored for hospital healthcare management systems using 100% T-SQL.
- Engineered optimized data structures and database models to manage complex clinical data flows, ensuring high data integrity and scalability.
- Developed advanced database queries, views, and procedures to address critical business questions and optimize healthcare operational analytics.
- Structured data workflows and technical repository documentation focused on solving data redundancy and improving clinical informatics processing.

HospitalDashboardPower-BI | Healthcare Analytics & Data Visualization

(<https://github.com/pcho120/HospitalDashboardPower-BI>)

- Designed and developed an end-to-end Power BI dashboard to track, analyze, and visualize critical healthcare operational metrics and patient delivery KPIs.
- Engineered interactive data models and optimized DAX queries to transform raw hospital datasets into dynamic insights, facilitating data-driven executive decision-making.
- Formulated comprehensive visualizations focusing on operational efficiency, resource allocation, and clinical informatics performance to streamline hospital workflows.
- Implemented clean data transformation (Power Query) and robust data-loading processes to ensure accurate dashboard performance and continuous data integrity.

ACTIVITIES & VOLUNTEER

- **Leadership:** President of Young Adults Group at Toledo Korean Church, Secretary of Korean Student Association (KSA).
- **Community Engagement:** Volunteer at Free Health Screening Event hosted by the Asian Resource Center (2017, 2018), Volunteer at Van Buren Intermediate School District Migrant Education Program (2017), Teacher at Korean Language School (2023-2024).
